Relevant Experience

Software Engineer @ *BenchMark IT services*

July 2019 – March 2022 // *Melbourne, VIC, Australia*

➢ Worked with variety of languages such as React, Node, HTML, CSS

   On Front End

➢ Designed and developed Front end for the company, mainly the login page, sign up page and dashboards

➢ I was involved with UI/UX team to develop components with Reactjs, HTML and Pure CSS (Sometime Bootstrap, Material UI) and forward it to the full stack developers, so they do not have to worry about pixel perfection.

➢ The company used agile methodology and required attention to detail because performance was the key element. We used cypress.io for testing.

➢ Developed pixel perfect cross browser layouts.

   -Developed JavaScript required to make best UI/UX experience.

   - Developed responsive layout to meet current web standards.

   - Develop reusable components.

   - Develop single page applications using Reactjs

   On Back End

➢ Worked in a team to design the schema for the backend and created a database using Node and Mongo

Personal Projects

Vally's Bliss

September 2022

A freelance work for an event management company. It includes designing, developing and hosting. The website built with Reactjs and pure CSS. Some of the libraries I used are react-scroll and framer motion.

Reactjs, CSS, react-scroll, Framer-motion

A Nodejs Rest API

June 2022

A simple Nodejs REST API in created with express. Used bcrypt to hash the passwords and jwt to create and refresh tokens. Working link is in my git repo.

Nodejs, Express, bcrypt, jwt authentication

React E-Commerce Website

August 2020

A Basic E Commerce website with the functionalities like details of product, modal showing the basic info and the state and add to cart button and the component showing all the items added to in cart.

Reactjs (Context API), Bootstrap 4, Styled components
